

BIOACTIVE PEPTIDE

Discover the potential of bioactive peptides, biologically active low molecular weight fragments derived from proteins. These peptides offer a range of beneficial physiological effects, including antimicrobial, antiviral, antidiabetic, antioxidative, anti-aging, and antihypertensive properties. Sourced from both animal and plant origins, our bioactive peptides are synthesized using advanced microwave SPPS technology. Ideal for functional food products and nutraceuticals, our peptides ensure the highest quality and effectiveness.

COSMETIC PEPTIDES

Cosmetic peptides play a crucial role in many skincare products, supporting anti-aging and wound healing processes. They are categorized into signal peptides, neurotransmitter peptides, and carrier peptides based on their mechanisms of action. With the rising demand for high-quality cosmetic peptides, Serox GmbH stands out by manufacturing premium biologically active and purified cosmetic peptides. We offer cGMP- and research-grade peptides in quantities ranging from milligrams to kilograms, tailored to your specific needs.

CUSTOM PEPTIDE

At Serox GmbH, we excel in providing custom peptide solutions with cutting-edge technology. Offering a wide range of modifications, purity levels and formats, we meet your unique requirements efficiently and effectively.

- ✓ **98> Purity**
- ✓ **No win – No fee**
- ✓ **Up to 150 AA**
- ✓ **Customized**
- ✓ **Fast and Secure Shipping**
- ✓ **Online Order**

INNOVATION & TECHNOLOGY

As a leading German manufacturer specializing in peptide synthesis, Serox GmbH employs advanced automated solid/liquid-phase peptide synthesis technology.

Our high-quality peptides support innovative programs in peptide drug discovery, research and development (R&D), and in vitro diagnostic development.

We serve both industry and academia at the competitive prices.

>98% PURITY
Quaranteed high purity

CUSTOMIZED MODIFICATION
Tailored modifications to meet your needs

PEPTIDE SYNTHESIS
Up to 150AA
Utilizing modern, fully automated equipment

BEST PRICE GUARANTEED
Competitive Pricing assured

FAST AND SAFE SHIPPING
Prompt delivery, national or international

ONLINE ORDERS
Convenient online inquiry and ordering via our website

PEPTIDE SYNTHESIS SERVICE HIGHLIGHTS

- » Synthesis Scale: From crude to >98% HPLC purity, from milligrams to kilograms.
- » No Peptide, No Charge: If we fail to produce the peptide, you don't pay.
- » Wide Range of Modifications: Over 50 modifications, including N/C-terminal side chain cross-linking and unnatural amino acids.
- » Detailed Documentation: Each peptide comes with CoA, MS spectra, and HPLC chromatograms.
- » Fast Turnaround: Most peptides under 30aa are delivered within 2-3 weeks.

We are an innovation company supported by the German Ministry of Education and Research

OUR OFFER

We produce a variety of peptides, from short to long and complex sequences, according to your specifications.

Quality and identity are assured through state-of-the-art analytical methods like HPLC and MS. Each custom peptide comes with a detailed Certificate of Analysis (CoA).

On request, we offer quantitative Amino Acid Analysis (AAA) to determine the relative amino acid composition and individual free amino acids in synthetic peptide samples.

OUR COMMITMENT

- ✓ Highest Quality: We ensure the highest quality products with a short delivery time.
- ✓ Fast Turnaround: Most custom peptides are shipped within 2-3 weeks of order confirmation.
- ✓ Confidentiality: Full confidentiality for all peptide synthesis orders.
