

BIOACTIVE PEPTIDE

Unlock the potential of bioactive peptides - biologically active, low-molecular-weight fragments derived from proteins. They offer diverse physiological benefits, including antimicrobial, antiviral, antidiabetic, antioxidative, anti-aging, and antihypertensive effects.

Sourced from both animal and plant origins, our peptides are synthesized using advanced microwave SPPS technology. Perfect for functional foods and nutraceuticals, they deliver superior quality and efficacy.

COSMETIC PEPTIDES

Cosmetic peptides are key ingredients in modern skincare, supporting anti-aging and wound healing. Based on their mechanisms, they are classified as signal, neurotransmitter, or carrier peptides.

With growing demand for **premium bioactive ingredients**, Serox GmbH delivers biologically active, purified cosmetic peptides. We offer cGMP- and research-grade products from mg to kg scale - customized to your specific needs.

CUSTOM PEPTIDE

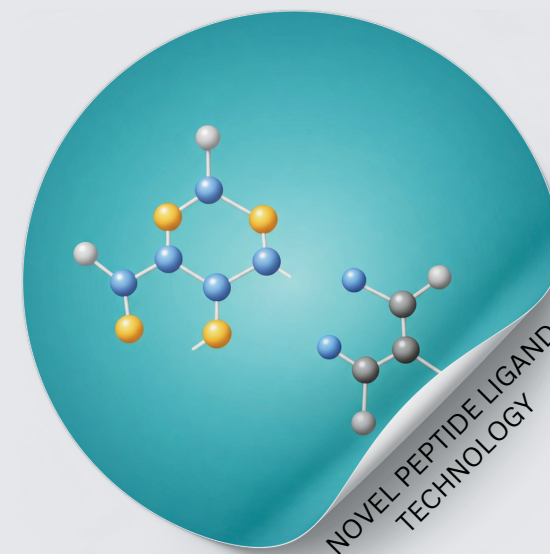

At Serox GmbH, we specialize in delivering custom peptide solutions using cutting-edge technology. With a broad selection of modifications, purity levels, and formats, we efficiently meet your unique requirements.

- ✓ **>98% Purity**
- ✓ **No win – No fee**
- ✓ **Up to 150 AA**
- ✓ **Customized**
- ✓ **Fast and Secure Shipping**
- ✓ **Online Order**

Made in Germany

INNOVATION & TECHNOLOGY

As a German manufacturer specializing in peptide synthesis, Serox GmbH employs advanced automated solid/liquid-phase peptide synthesis technology.

Our high-quality peptides support innovative programs in peptide drug discovery research and development (R&D) and in vitro diagnostic development.

We serve both industry and academia at the competitive prices.

>98% PURITY
Quaranteed high purity

CUSTOMIZED MODIFICATION
Tailored modifications to meet your needs

PEPTIDE SYNTHESIS
Up to 150AA
Utilizing modern, fully automated equipment

BEST PRICE GUARANTEED
Competitive Pricing assured

PEPTIDE SYNTHESIS SERVICE HIGHLIGHTS

- » Synthesis Scale: From crude to >98% HPLC purity, from milligrams to kilograms.
- » No Peptide, No Charge: If we fail to produce the peptide, you don't pay.
- » Wide Range of Modifications: Over 50 modifications, including N/C-terminal side chain cross-linking and unnatural amino acids.
- » Detailed Documentation: Each peptide comes with CoA, MS spectra, and HPLC chromatograms.
- » Fast Turnaround: Most peptides under 30aa are delivered within 2-3 weeks.

FAST AND SAFE SHIPPING
Prompt delivery, national or international

ONLINE ORDERS
Convenient online inquiry and ordering via our website

We are an innovation-driven company supported by the German Federal Ministry of Education and Research

OUR OFFER

We produce a wide range of peptides - from short to long and complex sequences - customized to your specifications.

Quality and identity are ensured using state-of-the-art analytical techniques such as HPLC and MS. Each peptide is delivered with a detailed Certificate of Analysis (CoA).

Upon request, we also provide quantitative Amino Acid Analysis (AAA) to determine the composition and free amino acids in your synthetic peptide samples.

OUR COMMITMENT

- ✓ Highest Quality: We ensure the highest quality products with a short delivery time.
- ✓ Fast Turnaround: Most custom peptides are shipped within 2-3 weeks of order confirmation.
- ✓ Confidentiality: We guarantee complete confidentiality for all peptide synthesis project.
